ImageStream New Product Update

Gigabit Ethernet Rebel Router (Item Code: RR1000-GE)

ImageStream has added embedded Gigabit Ethernet ports to their popular high-performance Rebel Router. For those who would like to take advantage of ImageStream's leading DS3/E3 router on the market and utilize it for your Gigabit Ethernet network infrastructure, we are pleased to announce that we have them in stock and ready to ship.

The ImageStream Gigabit Ethernet Rebel Router is equipped with four Gigabit Ethernet ports and two Fast Ethernet ports. ImageStream has integrated these ports into the chassis which still allows for two PCI expansion slots. Comparable with Cisco 2800, Cisco 3800 and Cisco 7200 series routers, the RR1000-GE offers wire-speed performance and is capable of routing a full DS3/E3 circuit or up to 16 T1s/E1s, even in rich processing environments using firewalls, access lists, and Quality of Service.

The Gigabit Ethernet Rebel Router starts at just \$2499. You'll also enjoy 12 full months of technical support and warranty, a 31-day money back guarantee, and software upgrades for life at no additional cost.

Gigabit Ethernet Rebel Router (RR1000-GE)

Chassis: Steel 1U 19" rack mount

Memory: 128 MB SDRAM

Storage: Fixed flash disk

Network Ports: (4) Gigabit Ethernet, (2) 10/100 Fast Ethernet

Enjoy maximum performance for BGP, QoS, VRRP failover, dynamic routing, VPNs, NAT firewall and much more.
